

It has come to my attention that the FCC is considering replacing a station that serves my area on FM translators with an LPFM alternative station. I presently listen to station K-LOVE on 105.5 in the Mesa, Arizona area. In its present form this station serves the residents of my community with family friendly programming (in terms of values and standards), as well as a source of public service announcements and information. Losing K-LOVE would have a deleterious effect on community standards and the quality of life in the community would suffer as a result. K-LOVE serves the public interest by providing positive programming and frequent public service announcements.
